Description

PREMIUM (ELITE TRAILERS)

- Elite Series** trailers are heavy-duty trailers designed to fit all one-, two- and three-seat watercraft models. Trailers are available in two place and four place configurations.
- Fully Welded Frame: The Triton difference -- all-aluminum, fully welded frame provides a solid structure for years of loading and unloading. Custom extrusions and robust 3" x 3" frame with scallop design provides added strength.
 - Tongue Jack And Ratchet Straps: 1000# swivel wheel tongue jack with 10" up/down travel helps you easily move the trailer into position. Rear ratchet straps secure machines and retract when not in use (2 straps per machine).
 - All Stainless Steel Hardware: Durable for use in salt water.
 - Designed To Fit All Watercraft Models: Adjustable 6' bunks and Infinite Slide Adjust (ISA) bow stop allow for proper fit of any personal watercraft, from one-seat to three-seat models.
 - Adjustable Bunks: Bunks can slide from left to right to properly accommodate the craft hull. Bunks can also be angled to perfectly cradle the craft.
 - Walk Plank And Molded Steps: Fenders with integral molded steps and an aluminum walk plank between machines provide multiple step points to access and tie down machines and gear.
 - Galvanized Torsion Axle: Independent suspension with four cord rubber torsion axle provides a smooth ride. WC2-2 & ELITE WCIV are standard with tandem torsion axles. ELITE WCII is standard with a single torsion axle.
 - Sealed LED Lights: Sealed lights and wiring harnesses throughout trailer resist corrosion caused by moisture.
 - Multiple Tie Downs: Four welded aluminum tie downs provide multiple points to secure crafts.
 - Keel Guard: Non-marring, UV-resistant keel guard is positioned at a potential impact area to shield the craft.

Number of Watercraft : 2

TRAILER EQUIPPED WITH OPTIONAL ALUMINUM WHEEL UPGRADE
