Description

2024 Triton Trailers LTWCI-X Watercraft Trailer

VALUE (LT TRAILERS)

LT Series trailers are **designed to fit most one-, two- and three-seat watercraft models**. Trailers available in one place and two place configurations.

- **Fully Welded Frame:** The Triton difference -- all-aluminum, fully welded frame provides a solid structure for years of loading and unloading. Custom extrusions and robust 2" x 3" frame with scallop design provides added strength.
- **Tongue Jack and Ratchet Straps:** Standard on LTWCI-X, LTWCI-TX, LTWCII-X models only. 1000# swivel wheel tongue jack with 10" up/down travel helps you easily move the trailer into position. Rear ratchet straps secure machines and retract when not in use. (2 straps per machine).
- **Designed To Fit All Watercraft Models:** Adjustable 6' bunks and Infinite Slide Adjust (ISA) bow stop allow for proper fit of any personal watercraft, from one-seat to three-seat models.
- **Adjustable Bunks:** 6' bunks can slide from left to right to properly accommodate the craft hull. Bunks can also be angled to perfectly cradle the craft.
- **Tie Downs:** Welded aluminum tie downs provide multiple points to secure crafts. LTWCI, LTWCI-X models have 6 tie downs. LTWCII, LTWCII-X models have 2 tie downs.
- **Galvanized Axle:** Galvanized axle for corrosion resistance. LT Series models are standard with single spring axle except model LTWCI-TX is standard with single torsion axle.
- **Sealed LED Lights:** Sealed lights and wiring harnesses throughout trailer resist corrosion caused by moisture.
- **Keel Guard:** Non-marring, UV-resistant keel guard is positioned at a potential impact area to shield the craft.

Number of Watercraft : 1

Accessories Included:
- Tire Upgrade ST145/R12E and Aluminum Wheels

- Tongue Jack
- Retractable Ratchet Straps

- **Galvanized spring axle**
